### ELECTRONIC PROTECTORS FOR APPLIANCES

**BREAKERMATIC® Artefactos de Cocina**, allows you to protect small appliances against damage that can be caused by blackouts, high or low voltage and transient surges. It has two outputs that allow you to connect two devices, as long as the sum of the currents and loads does not exceed the specified maximum.

#### IDEAL FOR:

- Clothes washers and dryers.
- Automatic dishwashers.

#### FEATURES:

- Protection against: low voltage, high voltage and blackouts.
- 5 sec. waiting cycle that allows the stabilization of the electrical network.
- Suppression of transient overvoltages caused by atmospheric discharges or connection of loads.
- 4 indicator LEDs to indicate the status of the protector.
- Fully automatic operation.
- Installation: Plug and play.

#### AVAILABLE MODELS / TECHNICAL SPECIFICATIONS:

Code	Nominal Voltage	Maximum Current	Maximum Load	Pole to Ground	Disconnection Voltages	Transient Voltage Suppression	Input Connection	Output Connection		
PCC110-150EST	120VAC	10A	1250VA	YES	Low V. Cut-Off: 95 VAC ± 3% / High V. Cut-Off: 138VAC ± 3%	270V / 474J	5-15P (B)	5-15R (B)		
PCC220-150EST	220VAC	7A	1540VA	YES	Low V. Cut-Off: 200 VAC ± 3% / High V. Cut-Off: 264 VAC ± 3%	470V/840J	5-15P (B)	5-15R (B)
